Sunroof

### RESEARCH BREAKTHROUGH GIVES HOPE TO BREAST CANCER PATIENTS.

It's a frightening fact: 1 in 8 women will be diagnosed with breast cancer before their 85<sup>th</sup> birthday\*. Even scarier is the confronting reality that not all breast cancers respond well to therapy.

Triple negative breast cancer, which makes up around 15 percent of breast cancers, can be very difficult to treat, and patients often face a poorer prognosis. For these women, breast cancer is a terrifying road, filled with unknowns.

Your support of the Mater Cars for Cancer lottery helps to drive vital medical research like Professor Monteith's, and gives hope to women in their darkest of days. Purchase your tickets today.
